ORUPLOAD

OrUpload is an Internet-based system that works in conjunction with existing information programs.

Physicians, Hospitals, Medical device companies and manufacturers can report unique data correlations in order to better analyze the information that ultimately lead to better business and patient related decisions.

Modular in design, OrUpload offers outstanding flexibility for clinical data submission in an enterprise quality solution.

OrUpload simplifies the process involved in creating complex patient analysis and operational reporting.

OrUpload provides medical expertise from board certified physicians.

OrUpload technology and electronic data capturing programs increase efficiency and bridge the gap between retrospective and prospective patient outcome metrics.

OrUpload systems are developed and maintained in compliance with the FDA's 21 CFR Part 11, Electronic Records and HIPAA.

Pioneering Medical Business Intelligence

CLINICAL TRIAL INTELLIGENCE

Real Time Reporting and Progress
Trial Data Coordination
Multiple Trial Intraoperability
Custom Developed Research

MARKET INTELLIGENCE

New Product Reporting Strategy
Sales Reporting Strategy
Actionable Insight through Data
Acquisition and Analysis

SIMPLE ...

ACCURATE ...

SMART ...

In today's health care environment with decreasing provider reimbursements and increasing costs, decision makers as well as physicians must embrace the technology which provides a tool for controlling costs, improving patient benefits and economic efficiency opportunities.

ORUPLOAD Advantage

Electronic data capturing software at the point of care
Patient Reporting Outcome Search Engine
Unique Analysis Correlation Reporting
EDC Automation and Capture from CAS
Functionality and Interoperability
OrUpload is subscription based software
No Hardware or Software purchase costs
Can Operate in Windows or Mac Browsers
Available 24 hours/seven days/ 365 a year
Accessed from anywhere in the world
Modular in design for custom EDC requests
Data Encryption Authenticity and Administration
Tier one Provider Server Technology
Offsite data backup, storage and redundancy

"OrUpload Automation streamlines data analysis process by electronically capturing intraoperative navigation generated data and transforming it into a format that can be easily analyzed in relation to patient demographics variables, alignment measurements, and clinical and functional outcome measures. We are now able to stratify groups of patients, such as those with large initial deformities or flexion contractures, and develop intraoperative alignment targets most likely to yield positive clinical and patient-perceived functional outcomes."

*Dr David Stulberg, MD. Professor of Clinical Orthopaedic Surgery,
Northwestern University Feinberg School of Medicine*
